Document Title: Vital Signs Monitoring System in Cloud Environment	
Author(s): Zakariya Alaseel	
Summary of Evaluation:	3 - Good
Significance:	2 - Good
Novelty:	1 - New Idea
Quality of Presentation:	3 - Good
References:	2 - Needs improvement

Comments to Technical Program Committee (confidential):

Comments to Author:
This paper is good and nice to publish, it mentions about Vital Signs Monitoring System VSMS in private Cloud.

Please check these below issues with the EIT sample paper
- The title font should be 24pt Times New Roman and as in the EIT sample paper, it should not be bold
- The Headings "2. RELATED WORKS" should be "II. RELATED WORKS", in which these II., R and W characters are in 10pt Times New Roman and the others ELATED and ORKS characters are in 8pt Times New Roman
- Page 1, the first column, the 15th line from the bottom of the page, please remove this

new line "diseases and they will be needing more [NEW LINE] intensive care..."
- For all of your figure captions such as "Figure 1: VSMS Processes Flowchart", please use abbreviation "Fig.1. VSMS Processes Flowchart", figure captions should be centered
- Page 2, the heading "B. Architecture of VSMS", then the B character is not italic
- Page 2, the heading "3.1 Sensing and Detection System", inside the EIT sample paper, it should not be bold, but it is italic and it is only "1 Sensing and Detection System"
- Page 3, the Heading 4 has a spelling mistake INTEGRTION, it should be INTEGRATION
- Page 4, the 2nd column, the 3rd paragraph "Big Data historian..." the spacing of Big is too far from the left side
- Page 6, in the CONCLUSION section, please reword this sentence "This big data is being analyzed my using analytical tools which ...", do you mean "This big data is being analyzed BY using analytical tools which..." ?
- Please cross-check that you have mentioned all of your references inside your content, are you sure that you have mentioned the Ref. [6] and [7] any where inside your paragraph
- Re-format of the references should be done, as you wrote '[1]. F. Tay, D. G. Guo, L. Xu, M. N. Nyan and K. L. Yap (2007). MEMS Wear-Biomonitoring System for Remote Vital Signs. Journal of Franklin Institute, 12.'; The EIT sample paper requires that the year should be at the end of the reference and it uses commas to separate instead of full stops , such as this correction example '[1]. F. Tay, D. G. Guo, L. Xu, M. N. Nyan, and K. L. Yap, "MEMS Wear-Biomonitoring System for Remote Vital Signs," Journal of Franklin Institute, vol. 346, no. 6, pp. 531-542, 2009.'
However may you check the year 2007 of the Ref. [1], as I am not sure but this work has been mentioned as 2009.

- The EIT sample paper applies left-and-right justify for the references.

The Reviewer would like to ask the authors to email him to NLp.Sr@Shaw.ca, because the Reviewer has a Microsoft Word template file that can support the authors to re-format the paper.
